

MONAD METROPOLIS

K-pop collectibles with onchain receipts

Open a pack, reveal a card,
and keep a result you can verify.

Consumer Products & Payments

Live on Monad Testnet

Collectors want the card. The journey is fragmented.

01

Pack information

Hard-to-compare odds
and card details.

02

Trust in the result

Limited visibility into
how results are assigned.

03

Life after opening

Storage, resale and
delivery are disconnected.

Start with the opening moment.
Make its result traceable.

The Iruka experience

Girl Groups Monad Testnet Redemption unavailable

Debut Pack

Batch IRK-MON-2026-001
Remaining: 90

0.00001 test MON

Pull a pack

Pack odds

Common	60%
Rare	28%
Epic	9%
Legendary	2%
Iruka	1%

Before the pull

Price, supply and initial rarity odds

After the pull

A revealed card and a saved Explorer receipt

Choose a pack → Request → Reveal → Collect

The Monad integration

EVM-compatible rails for small, frequent collectible purchases

New for Metropolis: Monad contract deployment, MON wallet routing, an independent batch and Keeper recovery.

Commit

Supply and inventory roots committed before opening.

Reserve & fulfill

A draw reserved onchain.
Keeper submits committed proofs.

Verify & restore

Result and event checked.
Saved requests can resume.

Monad integration built October 6-7 on the existing Iruka app and pack contract.

Monad and GIWA keep separate contracts, requests and collections.

Monad testnet validation

Live scenarios: October 6-7. Receipt and automated checks: October 8.

Live testnet evidence

6 recorded Pulls

Receipts, events and contract state match.

Recovery and resume

Refresh, interrupted requests and scheduled recovery.

Concurrent fulfillment

8 triggers across 2 requests; one fulfillment each.

Native MON transfer

0.001 test MON; receipt and exact value checked.

Scope: testnet flow and recovery. Physical custody and redemption remain planned.

Automated checks

424

All Node tests passed

13

Contract tests / Monad mode

Release build passed

Monad address and config checks

Source-verified contract

Public Pull evidence

Scenarios and verification

Next: a physical collectible pilot

Theo Yang

Full-stack Engineer

First cohort

Recruit through collector communities and the BlockchainValley network.

Physical pilot

Validate inventory, custody and rights before launching a small physical drop.

Planned revenue: pack margins and marketplace fees.
